TheGoFor Releases ReverseIt, Now You Can Reverse Video Clips

Valles Mines, MO (December 23, 2009) - TheGoFor announces the release of ReverseIt Media Software 1.0, a program for the Windows XP and higher platforms, that allows you to reverse the direction of video clips.

ReverseIt Media Software 1.0 allows you to reverse the direction of almost any WMV or AVI video clip. Make your videos go forwards and backwards. Make that fall 10 times funnier. Then post your videos online.

"With the release of ReverseIt Media Software 1.0," said TheGoFor President, Gary Mincy, "we needed a single program that would reverse video clips, without having to decompress in one program, reverse the video in another and the audio in still another. After creating this program I understand why this task hasn't been taken on yet. But I'm glad we did."

ReverseIt Media Software has an intuitive interface that makes it easy-to-use. All help instruction is video-based, which get you editing your video clips in minutes.

System requirements:

ReverseIt Media Software will run under Windows XP, Windows Vista, Windows 7, Window 2000 and higher. It requires a minimum 8MB of RAM and 100MB of free hard disk space.

ReverseIt Media Software is available for \$9.95 from TheGoFor Web site at <http://www.thegofor.com/>

For more information on ReverseIt Media Software or other products from TheGoFor, visit the company's Web site at <http://www.thegofor.com>.
